

Greening Greater Toronto Marketplace at Discovery 09

On May 12th, the Ontario Centres of Excellence Discovery 2009 event showcased, for the first time in Canada, the Greening Greater Toronto Marketplace, co-presented by the Toronto City Summit Alliance and the Toronto Region Research Alliance. This was a major cross-sector procurement event focused on presenting innovative green technologies and services that deliver environmental benefits and positive business returns.

Green technology firms, industry experts and senior procurement executives joined together to network, explore and buy new technologies and develop strategies to integrate green purchasing for sustainable practices.

The event consisted of an exciting line-up of green suppliers delivering fast-paced presentations in the Marketplace Theatre, located next to the Discovery 2009 Green Zone. The Marketplace aisle was also bustling with supplier exhibits and demonstrations. Event highlights included:

- Bell-ringing opening ceremonies
- 27 vendors presenting and exhibiting green technologies and services to over 140 registered buyers within the Greening Greater Toronto Marketplace theatre and aisle
- Panel discussion moderated by Kim Parlee (Anchor & Host, Business News Network), with Dr. Blair Feltmate (Director, Sustainable Development, Ontario Power Generation) and Scott McDougall (CEO, TerraChoice)
- Green talk stations, as well as two private meeting rooms for suppliers and buyers to meet one on one, throughout the day

If you have questions about the Greening Greater Toronto Marketplace, please contact Gautam Patel (gpatel@greeninggreatertoronto.ca).
